Part I**

ATLANTA, GA.
February 15, 2001
Report Supplied By USDA
Trucklot buying interest remained light and unaggressive as dealers kept floorstocks as closely balanced as possible. Offerings of boneless skinless breasts were readily available, however, bone-in breasts were generally balanced. Drums and thighs were at least sufficient, and wings were adequate. Distributive channels saw better movement today where brisk holiday movement through restaurant lines was a factor. The market tone remained fully steady on bone-in breasts, no better than steady on boneless skinless breasts, about steady on the balance.
