Weather Protect Weed Control for Top Yields

Weather is one of the most important factors affecting weed control in corn today. Dry, wet or cold weather can lead to erratic weed control, especially with soil-applied herbicides.

Herbert Roos and Jim Campbell have taken steps to weather-protect their weed control by switching from inconsistent preemergence programs to using a planned post program with DuPont™ Basis Gold® herbicide. They have seen their decision pay off in more reliable control of both grasses and broadleaves—as well as award-winning yields in the 2000 National Corn Yield Contest.

Unlike soil-applied herbicides, Basis Gold® doesn't need rain to deliver burndown control of emerged grasses and broadleaves. With a passing shower, the residual activity kicks in to control foxtails, waterhemp, giant ragweed, pigweeds, velvetleaf and lambsquarters, and helps keep fields clean through harvest. When growers look at costs, Basis Gold® is up to \$3 per acre less than the leading competitive program.

"We have had real good luck with Basis Gold," says Roos, a first-place yield winner in Illinois.

"It seems like the preplant treatments will play out, and then the waterhemp and foxtail come in late. We haven't seen Basis Gold® run out, even in years with heavy rainfall."

Sandbur, lambsquarters and cocklebur are among the major weed problems for Campbell, who farms near Canton, Mo. Basis Gold® has proven itself effective and crop safe—something that Campbell notes is not always the case with a preemergence program.

"I've had times with a pre-only program where we went two to three weeks without rain and it never activated. By the time we got rain, the weeds were too big to control," says Campbell, a third-place yield winner in Missouri. "Basis Gold® doesn't affect the corn one bit. We can spray corn four to ten inches tall, and it just keeps on growing. It just does a fantastic job."

Always read and follow the label. Basis Gold® is a registered trademark of E I du Pont de Nemours and Company.

On The Mark, Get Set, Grow!

The 6100 Series Rigid And Vertical Fold Planters.

Precision farming starts with precision seed placement. And that's exactly what you'll get with the White 6100 Series planters. Our pull-type planters feature an exclusive air-metering system that's designed to singulate every seed.

Its low air pressure, edge-drop seed discs and short, 18" seed drop ensure precise seed placement for maximum germination.

Adaptable To Any Tillage Situation.

Our 4, 6, 8 and 12 row planters have the flexibility to meet most tillage

practices both now and in the future. They're built rugged with a massive 7" x 7" frame and strong, welded-tongue design to handle the demands of heavy residue. Add a 6900 splitter attachment for interplant capability.

This season get the planter that places each seed where it'll grow the best — and perform the best. Stop by your AGCO® White Planter dealer today.
