What makes the **TORO TWISTER** So Special?

Special Active In-Frame Suspension

(1)

(2)

(3)

The Twister has a unique Active In-Frame Suspension that greatly improves traction and gives you a smooth ride, even over rough terrain.

The Twister suspension provides better traction and a superior ride compared to the rigid-frame competition. Unlike a rigid-frame vehicle, the Torsional Pivot Joint (1) connects the front frame to the rear frame (2). It creates a flexible frame that keeps all four wheels in contact with the ground as it travels over rough terrain (3). This flexibility also gives the front cab a smoother ride.

A new all-purpose vehicle... with a twist

Special Tight Turning Radius

When you get into a narrow spot, a tight turning radius makes all the difference.

The Twister's 70 degree Sector and Pinion steering provides a very tight 9 foot turning radius, the best in its category.

Special Durable 14.75 cu. ft. Cargo Bed

A tough, durable double-walled polyethylene cargo bed that's built to last.

It keeps its shape and stays dent and corrosion resistant, with no liner needed. A hefty 1000 lbs. Cargo bed capacity and a total load capacity of 1400 lbs. make Twister tops in its class. Quick release latches and a balanced load box design make dumping a breeze. Optional electric lift is available.

Special Projects and Jobs are easier with over 20 options available for you

Electric Bed Lift - makes it easier to dump heavy loads

Electric Winch and Brush Guard Bumper

Stake Sides - to haul bigger loads and volume capacities

Operator Shield - to protect the riders from loads

Hitch Kit - for towing your boat or whatever you haul along.

And NOW, for a limited time, only on the Toro Twister...

Special 6.9% a.p.r. Financing*

See what's so SPECIAL at your local "full service" Toro Twister Dealer TODAY!!!
