"Better Feeders"

Feedsaver Design on Schuler "Better Feeders" extends the elevator chain back under the apron. This keeps feed loss between the elevator and apron to an absolute minimum. Floor flights are supported by chain lifters in order to clean apron of material that may be lost due to floor apron sag. Elevator chain sweeps across the bottom of the trough, keeping it clean.

The reliable standard of the industry

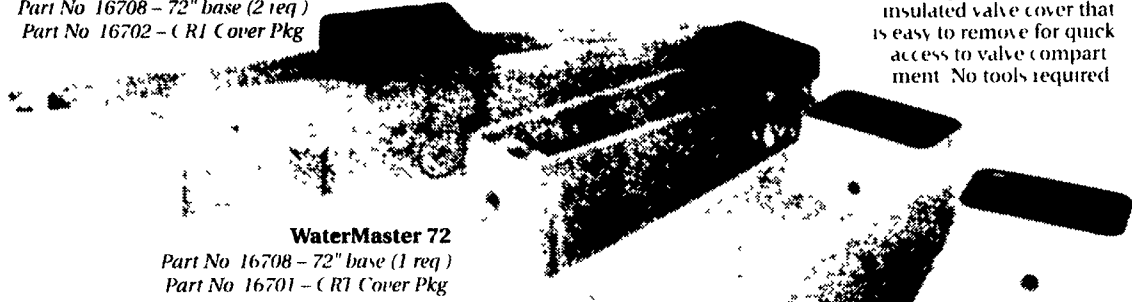

Ritchie WaterMaster

More than 1/2
 of the water
 is lost to the stall
 during operations

Solid, structural built-in mounting holes for bolting unit securely to a cement pad

Open water encourages drinking...
