THE ADVANTAGES OF ROASTED CORN

- * **Earlier Harvest** - Our roaster will dry corn down eight to ten points of moisture.
- * **Higher Digestibility** - Research studies show that roasted corn is more digestible than high-moisture corn.
- * **Purer Feed** - Our wet growing season has the potential of producing mold spores in standing corn that is harmful to livestock, swine and poultry. Our flame roaster can effectively remove mold spores.
- * **Drier Total Ration** - With less fermented feed. Supplementing the hay and corn silage diet with dry corn aids better rumen health.
- * **Greater Profits** - Dairy herds fed roasted corn advance two to eight lb. per cow in milk and improves herd health.
