The benefits of using a 3 in 1 fertilizer are rather impressive.

Would higher yields impress you? How about better quality? K-MAG® can help. It provides a unique, naturally occurring combination of the potassium, magnesium and sulfur that your alfalfa needs. Since it's 100% water soluble,

nutrients are always readily available. And it won't affect soil pH – even at high application rates. To make K-Mag a big part of your balanced soil fertility program, visit www.kmag.com or see your fertilizer dealer today.

Visit back-to-basics.net for additional information on proper soil fertility
