# HAKARI ALASKA BROMEGRASS

## Great Drought Tolerance! Fast Establishment

Hakari is a new type of Brome with very fast establishment, excellent drought tolerance, and very high protein and digestibility. Hakari is easy to mow and dry and not as sod forming as smooth brome. Very late maturing. Hakari's high palatability makes it good for grazing together with Baralfa 42-IQ in drought prone fields.

### HAKARI BROME MAKES A GREAT COMPANION FOR ALFALFA

as shown in this photo. Seed at 6-8 lbs. in new alfalfa stands, or no-till 20 lbs. to rejuvenate old stands. For straight stands, seed 35-40 lbs.
