

PFGC Accepts New Members

HERSHEY (Dauphin Co.) — Pennsylvania Forage and Grassland Council (PFGC) has announced membership rates for 2002.

The Council, with your membership and support, can accomplish much toward a better forage industry, envi-

ronment, and community.

It's a big challenge and the PFGC needs your help. By becoming a member now, PFGC can serve an even more active role in support of the forage industry.

The PFGC, formed in 1960, is made up of individu-

als and organizations that are interested in forage and grassland-based agriculture. The PFGC is dedicated to the production and utilization of quality forage and grassland.

The PFGC works in a variety of ways to promote the industry, through publication

of Pennsylvania Forage and Grassland News, through the publication of *Foraging Around*, and sponsoring individual workshops, training events, field days, Ag Progress Days, leadership, and other activities.

Every member receives the

Pennsylvania Forage and Grassland News, the Hay and Forage Grower magazine, and a PFGC membership directory.

So to become part of a growing industry, use this membership form included here to sign up now.

PFGC New Member Application Form

Name _____

Address _____

County _____

Phone (____) _____

Occupation (check one) _____ Industry

Dry and Dusty for the Northeast

This is what the headline could read for the upcoming growing season in that event DOEBLER'S is offering its own "supplemental insurance" in the form of DROUGHT TOLERANT HYBRID CORN to help you guard against loss. Let's take a look

82XP and 82XPRR (Roundup Ready®) @ 118 days RM are highlighted for their outstanding drought tolerance. Both are effective as dual purpose hybrids (grain and silage) with good test weight.

469XP and 469XRR (Roundup Ready®) @ 97 days RM are BIG hybrids with excellent grain and silage yields as well as early vigor. They display good late season appearance & rapid dry down.

75X2, 75X2RR (Roundup Ready®) and **75X2CL** (Clearfield®) @ 116 days RM are great performers in all types of conditions. Attractive, dark green plants, they're ideal for ear picking.

383X @ 87 days RM has great stalks, consistently high yields, good late season intactness and does well under stress. Excellent test weight and early vigor make this a great early hybrid.

636XY and 636XCL (Clearfield®) @ 109 days RM are two of Doeblers' most popular hybrids. Drought tolerance and consistent yield are why!

296XP @ 85 days RM is another of Doeblers' early hybrids with outstanding yields. Great stalks & early vigor enhance its performance.

All of the above hybrid recommendations work best in moderate populations.

Take advantage of Doeblers' 4% CASH DISCOUNT* or its Farm Plan® Option 4*. Order before March 23.
