SEWAGE TREATMENT SYSTEM FOR SALE

Unused F.A.S.T. (Fixed Activated Sludge Treatment) System. Biologically oxidizes organic matter to produce a clear odorless effluent which is then disinfected by an ultraviolet sterilizer. This system was originally designed to be used onboard ships but is also usable on land. It is sized for approximately 125 people or 7000 gallons per day. The effluent could be directed toward a stream, or used for watering.

Arrangement This system includes two pumps, a Roots blower, UV Sterilizer, diverter valve, three float switches, control panel and remote alarm panel. All equipment except the remote alarm panel is assembled on the unit.

The tank is approx 16' long x 8' wide x 9 ft high. Drawings and more detailed information is available. Although the system is unused and never run, bearings and seals in the motors may have to be replaced due to long storage. The original price was approx \$55,000.

Our price is \$18,000.
