Oregon Enhances Orchardgrass Web Site
State Produces Majority Of U.S. Orchardgrass Seed

Working with the Oregon State University Forage Information System, the Oregon Orchardgrass Commission has expanded its internet web site. Located at www.orchardgrass.org, the site contains information about orchardgrass seed.

Visitors to the site will find

a comprehensive directory of orchardgrass varieties and a list of Oregon seed dealers that sell orchardgrass seed. A key part of the site is a link to the Orchardgrass Information System (OIS). OIS is a valuable resource for livestock producers who want to effectively use orchardgrass in their forage program.

Approximately 250 farmers in Oregon produce almost 98 percent of all the orchardgrass seed grown in the United States. Orchardgrass is an important forage for livestock and is used extensively in pastures and for hay throughout the United States and in many foreign countries.

**Kverneland excellence
in a whole new field**

Super-Floater Suspension
• Patented cutterbar flotation system with dual suspension the cutterbar reacts to obstacles independent of the rest of the machine
• Lower ground pressure improves reliability and reduces crop stubble damage
• Tool-free cutting height adjustment

Round Taarup discs reject stone

Benefits:

Round discs reject stones more smoothly. It is impossible for a round disc to impact with a stone as it has no corners or leading edges. Foreign objects jammed between counter rotating round discs are never seen.

See our extensive family of hay tools which includes disc mowers, rakes and tedders

Kverneland

- The Number One selling round bale wrapper in The United States and the World
- Kverneland pioneered the wrap system in 1986
- Complete range of machines to suit every need three trailed models, two mounted self-loading, three mounted conventional, and now an ultra high capacity wrapper made expressly for large square bales up to 4'x4'x6' in size

Kverneland Kidd KD 825 Silage Chopper

- PTO driven discharge conveyor decelerates the chopped material ensuring an even and positive flow of feed without an excess of dust or loss
- Four other models are available for dry hay and straw applications
- Hydraulic bale lifter and slip clutch protected PTO together provide safe, smooth, low torque starts
