CASH FOR PUPPIES
Pure & mixed breeds handled to 8 weeks old in litter lots only.
Must be bug free & healthy
Call Jo Jo early mornings for best results
Pickups anywhere in Penna (if worth while)
Call Toll Free
1-800-392-4953 or 1-866-589-8900
Call only if you have pups to sell and for no other reason!

Hot Air Circulator
(Needs NO Electricity)

- Special top-vents create a natural draft
- Burns coal
- Cast Iron Doors & Grate
- Exterior handle for clean shake-down

Optional Electric Fan for the maximum heat circulation.

- All DS Stoves have hot air (or hot water) regulators
- All DS Stoves have cast iron doors and grates
- All DS Stoves have exterior shaker handle for dust-free shake down

Other times by appointment

Start Clean Next Spring with Fall Sprays

If weather delays next springs burndown applications you could wind up with some real weed-control headaches in your Roundup Ready soybean fields. That's where a well-planned timely fall herbicide application can help.

Fall applications provide early burndown of actively growing weeds plus residual weed control to help you plant into clean fields next spring - just like spring burndowns do. But with a fall application your fields will dry down faster for earlier planting and insects may be fewer due to less weed vegetation. Populations of soybean cyst nematode may also be reduced.

Fall applications of Pxython WDG herbicide at 0.8 to 1.0 ounce / 1 pint of 2.4-D and 1 pint of Glyphomax Plus herbicide per acre control tough weeds like purple deadnettle and henbit plus common chickweed, marestail, shepherdspurse, butterweed, field pennycress, yellow rocket, wild mustard, and early flushes of lambsquarters.

Make your fall application when soil temperatures have dropped to 50 degrees F and are continuing to fall. This will help Pxython WDG remain stable in the soil until it activates next spring.

One more benefit that Pxython WDG provides is the flexibility to plant corn if market or weather conditions dictate a change. Corny XL herbicide restricts growers to soybeans.

When next spring arrives you can use one 32-ounce post application of Glyphomax Plus to clean up any remaining weeds in your Roundup Ready soybeans. Or you can tank-mix 0.3 ounces of FirstRate herbicide with reduced rates of Glyphomax Plus to control and prevent ragweed, cocklebur, sunflowers or velvetleaf - a common weed problem in your fields.

For more information about using Pxython WDG and Glyphomax Plus herbicides in a fall-applied program, contact your local retailer.
