**Everlast Roofing, Inc. Metal Roofing & Siding**

**The Ultimate G-100 Process "The Best"**

- 1 Valspar 10S Finish Coat
- 2 Epoxy Primer
- 3 Zinc Phosphate Pretreatment
- 4 G-100 Zinc Coating
- 5 Full Hard Steel (80,000 min yield)
- 6 Heat formed less paint cracks

NOTE! It is more important what is under the paint than what you see on top!

- 1 One of the best paints, superior acid rain, cracking resistance and color retention
- 2 Primer coat promotes outstanding top coat adhesion
- 3 Zinc phosphate pretreatment. This is a very important process - if your current supplier cannot supply you with this or does not know, you should reconsider
- 4 G-100 Galvanized. Most metal roofing has approx. 40% less galvanized under the paint. G-100 is more galvanized than most unpainted panels
- 5 Full Hard. Anything less than full hard will bend easier, lower snow loads, etc.
- 6 Heat formed. Metal is painted before ribs are formed. Most paint cracks at bends. Heat forming greatly reduces cracks. (check metal siding that is installed for 5-10 yrs)
- 7 Stronger design superior strength more metal per L.F.
- 8 Add Everything Together And Price Should Be \$53.37 Per Square \$1.69 Per L.F.

**OUR SPECIAL PRICE ONLY**  
**\$48.32 PER SQUARE**  
**\$1.53 PER LINEAL FT.**
