GLICK'S NATURAL PRODUCTS

featuring "Bio-Zyme w/Miracle II"

Bio-Zyme Soil Inoculants

A Proven Help For Your Soil

- Is a product formulated to improve soil structure, plant growth and quality crops
- Adds living soil micro-organisms whose productive microbial processes provide essential nutrients for plant life
- Microbial activity builds HUMUS (organic matter)
- Increases root growth and mass, seed germination and emergence by reducing soil crusting
- Provides an optimum soil environment of plant health
- Easily applied using various irrigation systems spray, trickle, overhead, drip and surge
- May be soil and foliar applied
- Extensive field tests prove an increase in production
- Environmentally friendly

Directions for Use:

Bio-Zyme Soil Inoculants are to be used as part of your normal soil program usually one pint to the acre, one to three times per year. The best times to apply are in the fall about a month before frost, in the spring after temp is 50 degrees regularly, and can be foliar applied up to boot or bloom stage in the late evening or early morning. For household plants, yard and garden use, mix at the rate of 1 tsp per gallon of water for soil drench or spray.

Note:

Soil Inoculant + 20-20-20 is the exact same formula as the Soil Inoculant w/Humus but with NPK added. Not recommended for those who wish to remain strictly organic.

Bio-Zyme Waste and Odor Control

- Is an organic enzyme bacterial system to control your animal waste and odors
- Is an organic water and pond treatment
- Used in septic systems
- Breaks down solid waste and promotes composting
- Reduces flies and mosquitos, therefore aiding in controlling disease
- Promotes a healthier work environment
- Mixture Ration and Application Rates sheet available

Bio-Zyme Citrimate Disease Control

Is a product designed to control diseases on fruit trees, nut trees, citrus trees, shade trees, vegetables, lawns, rose bushes and houseplants. Apply with a spray mixture of approx 1 qt to 5 gal of water spraying the crop to the point of runoff. Also apply to soil underneath the trees. The best time to apply in the fall is after dormancy about a month before frost. In the spring after the leaves appear or anytime the trees or plants are under stress due to disease.

Prices

| | | | |
|---------------------------|----------|-----------------------------------|----------|
| Soil Inoculant + Humus | | Soil Inoculant + Humus + 20-20-20 | |

Important Note:

Due to the energy in the products there may be some leaking during shipping, therefore we will turn the lids very tight. When the product arrives to you, open the lids to release the air, then store product in a cool place with lids on the loose side, especially during the warm summer months.

*** NEW *
Miracle II Product
STRUCTURED WATER ENERGIZERS**

- Contains tubes with Miracle II Soap and Neutralizer
- Cleans and energizes your drinking water or rain water
- Used in industrial applications such as swimming pools, greenhouses, hog finishing houses, feed lots, dairies & farms
- Changes the water ions from positive to negative
- Increases the PH factor in your water

Testimonial:

We had just been hearing good results about the Water Energizers on the conference calls and decided to put one on the rain water line because the water had been having such a bad odor this past summer. We thought it's time to get the cistern cleaned out again which is always quite an ordeal and smelly and the opening to the cistern is inside the store at Glick's Natural Products.

Anyway, this past Tuesday PM, Oct 1st, we got a plumber to install a Water Energizer. The following morning the water had no more bad odor! We could hardly believe our noses but there simply was no bad smell left and it felt silky clean. Normally when using the shower bath it wasn't a good experience due to the bad smell, but on Wed morning it was quite pleasant and refreshing - what a relief!

Notes:

The company told us the Water Energizer is maintenance free and will last a lifetime. There are no parts to replace and no power required to run the Water Energizer. The water simply flows through the Water Energizer and as it makes contact with the tubes containing Miracle II Soap and Neutralizer, the water changes.

In a recent test in a commercial greenhouse, one side of the greenhouse was set up with its normal watering system and the other side was up with a Water Energizer. The crops on the side of the greenhouse with the Water Energizer were ready to harvest & ship a full eight days to two weeks sooner than the crops without the Water Energizer.

It was also reported that lawns became greener and healthier after watering with Energized Water. With swimming pools it was reported that the maintenance bill was \$200 a month less. I believe this was due to needing less chemicals.

Prices:

Residential Size \$900 (fits 3/4"-1 1/4" water pipes)

Commercial/Industrial Size \$1500 (fits 2" plumbing)
