Combination Hoof Care/Vet Chute

Standard hoof care attachments include; a rear splatter board, rear foot winch, two front foot winches and a full width belly band and winch to lift the animals weight off their feet. All winches have heavy duty friction brakes providing constant, positive holding action.

ALL STEEL PARTS ARE POWDER COATED USING THE PBZ FIVE-STEP PROCESS.

This highly versatile equipment can be used to secure a cow safely and efficiently for foot care or veterinary services.

Side panels and gates easily replace hoof care accessories to create a vet chute where almost any common vet procedure can be performed.

Once in the chute with the belly band winched into working position, the cow is safely secured for foot treatment
