

Satisfied for 27 Years!

Bob Simpson installed a 61'x15' Slurrystore® System in 1975. When additional waste storage became necessary, he had no question about what type of system to turn to. In July, Penn Jersey installed a new 123'x19' Slurrystore, which will be used in conjunction with his existing original structure. According to Bob, no other system can match the ease of agitation and emptying of the Slurrystore System.

The results you may achieve with your Harvestore® System depend primarily upon your management skills and may vary from successful results achieved by others. Any application in a particular farming operation requires the advice of qualified experts and is subject to limitations of good management, weather or other conditions present at the individual location. Harvestore is a registered trademark of Engineered Storage Products Co.
