### Binkley & Hurst Bros. Inc Offers This Low Cost Harrow Fueust Flex-i-ble Tine Harrow

Aerates and scarifies to stimulate growth, improve moisture penetration. Breaks up manure to speed decomposition, reduce parasites. Works in seeds after reseeding. Maintains rings and tracks 4 to 42 ft. widths. Adjustable penetration. Low maintenance.

*Increase Yields And Lots More!*

**HERBICIDE INCORPORATION:** Independent research using black light photography proves the Fuerst Harrow behind your disk or cultivator gives you "near perfect" incorporation in one pass - better than implements costing several times more! Shreds trash as it prepares & levels seedbeds

**BROADCASTING SMALL GRAINS AND GRASSES:** University of Illinois found over-seeding by broadcasting followed by a Fuerst Harrow a superior combination, out-performing equipment costing more than 10 times as much. Pulled behind the broadcaster, it covers seed to desired depth in one time-saving operation.

**SHREDS STALKS:** Shreds and spreads stalks in spring ahead of no-till and ridge-till planting. 4 to 42 ft. widths Flexes to cover every inch at 6-8 mph. No maintenance. Easy to use and store. Insist on the original "Spreading Action"® tines.
