Daily National Grain Market Summary

St. Joseph, MO
February 5, 2002

Report Supplied By USDA

Wheat bids were slightly higher, today, supported by export optimism and continued concerns over winter wheat conditions. Indications that Egypt may be in the market for US wheat gave firmness to bids. Corn bids were narrowly mixed, but mostly lower as lack export sales remain disappointing. Soybean bids lost most of yesterday's advances due to light fund selling on the Board. Forecasts for wet weather in Argentina and Southern Brazil weakened trade. Light export purchase by South Korea overnight was positive. Wheat steady to 3 cents higher. Corn mixed, mostly 1 cent lower except Omaha steady to 2 cents higher. Sorghum 2 to 3 cents lower. Soybeans 7 to 8 cents lower.

EXPORT SALES: PURCHASER COMMODITY TONNAGE DELIVERY DATE South Korea Soybeans 50,000 Apr-July

East Fluid Milk And Cream Review

Madison, Wis.

February 5, 2003

Report Supplied by USDA

Spot prices of class II cream, dollars per lb. butterfat: F.O.B. producing plants: Northeast: 1.2219-1.3600. Delivered Equivalent: Atlanta: 1.2538-1.3600 mostly 1.2644-1.2963.

PRICES OF CONDENSED SKIM, dollars per lb. wet solids, F.O.B. producing plants: Northeast: Class II, includes monthly formula prices: .9200-.9800; Class III - spot prices -.7200-.8600.

SPOT SHIPMENTS OF GRADE A MILK: FLORIDA: This week: In 0, Out 15; last week: In 0, Out 0; last year: In 6, Out 0. SOUTHEAST STATES: This week: In 0, Out 0; last week: In 0, Out 0; last year: In 0, Out 0.

The following are the January 2003 Class and component prices under the Federal Milk Order pricing system: Class II \$11.29 (down \$0.33 from December), Class III \$9.78 (up \$0.04); and Class IV \$10.07 (down \$0.42). The following are the product price averages used in computing Class prices: butter \$1.0872, NDM \$0.8207, cheese \$1.1307, and dry whey \$0.1728. The Class II butterfat price is \$1.1926 and the Class III/IV butterfat price is \$1.1856.

Milk production is steady to slightly heavier in most of the East. In the Northeast, the milk flow is mostly steady and milk supplies are moderate to heavy. In the Southeast, milk output is increasing along the coastal areas from the Carolinas to Louisiana. Elsewhere in the South, milk production is generally steady. Florida's need for milk eased this week as in-state milk production is increasing and demand is steady. Therefore, handlers had to ship milk out of state for processing, a trend that may continue if historic patterns are any indication. Bottled milk sales ranged from slower in the South to

good in the Northeast. Another storm and cold temperatures "blew through" the Mid-South, Middle Atlantic, and New England, which caused a short flurry of panic buying at some grocery stores. Bottlers reported good orders during the week-end, but slightly slower orders at midweek. Surplus milk volumes are moderate to heavy. Some cheese plants are down this week and the extra milk was looking for a home. Southeastern balancing plants ran some additional milk this week as a result of slower Class I sales and the milk coming out of Florida. This additional surplus milk supply was, in some instances, eased by one organization's need for extra milk to meet manufacturing commitments. Eastern butter/powder plants are busy, but most are not yet at capacity.

The condensed skim market is mostly steady and prices range from steady to lower now that February milk prices are impacting Class II transactions. Demand for wet solids is steady at best. Some users are looking at NDM as a less expensive alternative.

The fluid cream market is weak and prices are lower. Supplies are excessive and most producers and/or handlers continue to clear a large portion of their cream to butter producers. Reportedly, cream shipments from the East to Upper Midwest butter makers are heavy and have been since early January. Spot interest for Class II cream is slow to fair. Some buyers are taking advantage of the low prices to make some spot purchases. Some suppliers did drop their multiples to attract more Class II interest, particularly since most butter makers have significantly reduced their paying multiples. Cream cheese production is steady to slightly higher as some producers did take on some spot loads this week. Ice cream output is steady, but here too, producers are often able to purchase attractively priced spot loads. Bottled cream output is light. Churning activity is heavy.

Dairy Products Prices Highlights

Washington, D. C.

January 31, 2003

Report Supplied By NASS/USDA DAIRY PRODUCTS PRICES HIGHLIGHTS:

CHEDDAR CHEESE prices received for US 40 pound Blocks averaged \$1.13 per pound for the week ending January 25. The price per pound increased 0.7 cents from the previous week. Pasture Perfect® Dealer of the Week: Homestead Nutrition

This week Ampac Seed Company and Rohrer Seeds recognizes Homestead Nutrition, Inc., of New Holland, PA "We look at the whole picture," says Don Weaver, President and Owner of Homestead Nutrition "At Homestead, we place priority on integrity, trust and honesty in our relationships.

and in our stewardship of natural, economic, and human resources for healthy soil, crops and livestock We work from the soil up to provide quality service and products that perform "

Don Weaver Homestead Nutrition

Don is very impressed with the high quality Pasture Perfect® Mixes he's been buying from Rohrer Seeds, and wants his customers to know that it's not too late to plant ryegrasses "The Renovator Special mix works very well to thicken up thinning pastures and hay fields," says Don. "Overseeding should be done as soon as possible this spring to strengthen weakened pastures. This tetraploid mix establishes quickly to give high quality pasture forage."

Don adds, "Getting high quality pasture is more than putting good seed in the field, it also takes management We have added a pasture layout and consulting service to help you get results We welcome the opportunity to serve our community "

Metal Roofing & Siding
Since 1948

A.B. Martin Roofing Supply
Why Pay More - For Less
BUY DIRECT • WE MANUFACTURE

Roofing & siding in the following:
Aluminum • Galvanized • Galvalume
18+ Color Painted, #1 & #2 Material
Low Prices - Fast Delivery, Free Literature
Ephrata, PA 1-800-373-3703
Newville, PA 1-800-782-2712
(formerly Zimmerman Roofing)

The ROAST-A-MATIC Grain Roaster & Cooler Unit is superior to other methods of heat processed grain

- ~ Brings hot roasted grain to ambient temperature
- ~ No condensation on top of grain
- ~ Quality control - no hot spots from improper cooling
- ~ Grain can be put into storage cold

~ Prevents deterioration of elevator legs from hot grain condensation ~ Saves handling time ~ On the farm drying
Have your soybeans, corn, wheat, oats, sorghum and barley roasted, cooled and stored on your farm
