FENDT Technology
at Your Fingertips.

When You Get
Home At Night,

Try to Act
Like You're Worn Out!

That's Why They Call It A Joystick.

CVT...Continuously Variable Transmission. We call it "Vario" for short. You'll just call it smart, smooth and simple to use. Not to mention efficient, effective and, yes, even enjoyable.

The Vario maximizes the legendary FENDT performance, and is available on all FENDT 400, 700 and 900 Series models. Tests have shown Vario can increase power output up to 20%, and increase working efficiency up to 10%, all the while cutting fuel consumption by up to 10%.

Vario lets the tractor put all its power to work...effortlessly. So all you have to do is sit back, control the joystick, and enjoy the ride. (Which, by the way, is easy to do...but that's another story.)

Everybody's got a little 'ham' in them. Which is a good thing. Especially when you own a FENDT tractor. 400, 700, 900 series. It doesn't matter. Operator comfort and quiet come standard on a FENDT. And we don't mean just added cushioning and sound-deadening material.

A hydropneumatic front axle suspension system provides maximum comfort even with maximum loads. Innovative cab suspension absorbs vibration from the tractor frame while providing additional stabilizing front-to-rear. And then there's the speed-sensitive shock load stabilizing system. It automatically raises and lowers the rear hydraulics in response to forces from the hitch and front axle to compensate for the bounce.

Add all that to FENDT's Vario, the sophisticated continuously variable transmission, and you've got maximum performance, increased efficiency, better fuel consumption, and one fine ride. All you have to do is hobble on into the house every night like every muscle in your body hurts. (Hey, do it well and it might be good for an extra slice of pie.)
