Hydra Push Is Back

LEON - Manure Spreader
 "Material Handling Excellence"

"Silver Spreader"® Series **Hydraulic Push-Off Technology**

Ask about **OPEN HOUSE SPECIAL DEAL**

Leon "Hydraulic Push-Off Technology" is strong, steady, smooth, simple, trouble free, and reliable to guarantee the power needed to push the heaviest load. This technology eliminates the old fashioned approach to unloading which used apron chains, sprockets, shafts, idler slides, conveyer slats, etc. (developed in the last century) that are the heart of heavy maintenance costs and down time due to failure that are used on competitive machines.

The "Solid Poly Box" on the total floor and total sides is constructed from super slippery corrosion proof polyurethane plastic materials. It is not just a liner or surface coated plywood - but **SOLID POLY MATERIAL**. It eliminates any distortion when temperatures change and particularly eliminates manure freeze up problems in the winter months. Spreading is faster and easier in all weather conditions. The higher investment in these poly materials more than pays for itself in reducing corrosion, leakage, etc. Problems for the operator in the many years ahead.

Model SS - 375 > **2 sizes and both in stock at Umbergers**
Model SS - 425

The "Heavy Duty Push Gate" is steel reinforced to prevent twisting or bending under the heaviest loads. Floor and side guides, ensure smooth movement. The push off unloading speed can be adjusted, and the precisely fitting push gate ensures the solid poly box is clean at the end of each load. Notice the standard top gate extension to assist in handling large heaped loads.
