Designed For High Moisture Silage
GEHL 4x5 WET HAY BALER MODEL RB 2580 ROUND BALERS

Featuring the ALL-NEW Variable Open-Throat Power In-Feed System

GREAT BALING STARTS HERE
Variable Open-Throat Power In-Feed System
Here's how it works: The incoming crop is pulled off the pickup by the aggressive action of two power in-feed rolls - a 6-inch-diameter pivoting power in-feed roll on top and an 8-inch diameter fixed power in-feed roll on the bottom.
The top pivoting power in-feed roll rides over the crop as it is pulled into the bale chamber. An extension spring keeps the top roll under constant downward force.
The spring tension increases as the variable throat opens from a minimum of 3/4 of an inch up to a maximum opening of nearly 7 inches. The constant downward force of the pivoting upper powered in-feed roll, in combination with the fixed lower in-feed roll, both turning inward, pinches the crop and forces it into the bale chamber. The stripping roll strips crop off the belt and forces it down to the incoming crop. Adjustable scrapers on the stripping roll and pivoting roll eliminate buildup.

Gehl's power in-feed system opens to nearly 7" for large crop volume

Was \$17,900 NO TRADE FOB PRICE \$13,900
