Perun dry matter yield was **14.2 tons**, the highest in the entire grass trial. Trial ave. 11.10 tons In the 2001 Cornell Univ. Trial, the 2002 yield was **6.85 tons** of dry matter Trial average 5.29 tons (entered with ryegrasses). Great for short term rotations and pasture repair.

LOFA

A 5-year perennial ryegrass type. In the 2001 Michigan State Univ Trial, the 2002 dry matter yield was **6.99 tons** - the highest in entire grass trial. Trial average 4.86 tons.

For the Fastest and Highest Welds

If the field is not in a crop and herbicide residues are not an issue, teny Forage Oats can be planted alone or in combination with Dundale Forage Peas. Expect an excellent crop in 60 days. After harvest follow with one of our BMR sorghum sudangrasses. With be ready in about 40 days.

If the field is in Zorro of Green Spirit Italian Ryegrass make multiple cuttings harvesting at 20 inches. Continue cuttings until late May, then follow with one of our BMR sorghum sudangrasses. Don't forget to fertilize during green-up and after each cutting.

If the field is in a small grain or instagold Annual Ryegrass harvest at boot stage and follow with Summer Queen Bliff sorghum sudangrass. Annual ryegrass can be harvested prior to boot stage (20 incres or so) and cut a second time?
