BEEF TIPS Commercial cattlemen benefit greatly from crossbreeding of two or more breeds. By crossbreeding, hybrid vigor (or heterosis) is produced providing better performance than the average of the two parent breeds. Maximum heterosis results when the cow and bull are of entirely different breeds. Crossbreeding can also be used to combine the strengths of two different breeds. **PA & MP Simmental Assoc.** Call for your free Directory 717-334-6323 **www.cattleclick.com/psa** Information provided by American Simmental Association
