Crude Soybean Oil
A product of Keystone's expelling process, this oil can be used in a wide
variety of on farm applications. Crude soy oil is a natural alternative to
animal fats and provides needed energy in various rations
Uses of Crude Soy Oil Include:
• Use as a high energy feed ingredient in swine and poultry diets.
• Especially useful in sow lactation diets, pig starter and grow/finish diets.
• Used as an added energy source in broiler, turkey and layer feeds.
• Can be used for dust control purposes.
• Can be used as a lubricant for feeding systems.
Advantages of Crude Soy Oil:
• Use as a direct replacement for animal fat.
• Vegetable based product.
• Holding tank does not need to be heated if temperature is above
30 degrees, which reduces storage and handling costs compared to
animal fat.
