

Sheep And Goat

(Continued from Page 16)

resistance to various medications. Parasite behave pretty much the same in both sheep and goats, however in treating goats it is important to increase the dosage by at least half and in some cases double the

dose.

Goats metabolize most medicines differently than sheep and most often require higher doses.

With spring comes melting snow, rain, and that harbinger of every spring ... mud. Sheep and goats on wet, muddy pastures and lots can lead to foot problems, mostly foot rot. It is important to keep an

(Turn to Page 18)

It is important to observe the animals on pasture, since spring mud may cause foot rot.

- Ceiling systems designed for your dairy, swine, and poultry facilities, as well - as shops, warehouses, garages, arenas, and more.

Tired of working in a cold, noisy shop?

These ceiling systems are designed to hold any amount of insulation, and with insulation above, produce sound reduction qualities much greater than steel.

Is the banding in your hog or poultry barn deteriorating?

Let us replace them with our heavier polyester bands which do not stretch or become brittle over time.

Are you frustrated with the birds in your implement shed?

Get the problem under control with a triply ceiling, as well as greatly improving the lighting.

Contemplating a drop ceiling?

Demand a triply ceiling above your drop ceiling if there is insulation being installed. This will serve as a vapor barrier along with permanently preventing falling insulation.

Providing the Ag industry with a very durable, attractive, waterproof, noncorrosive, alternative to conventional ceilings at a fraction of the cost.

From 20¢ Sq. Ft. Installed!
