Wholesale & Retail Price List Provided

**CLIP & SAVE**

**Quality Lubricants From King**

Hagerstown, MD

Proven New Products → Super Solvent AW32 → NT oil additive → Skid Loader Oil → Hydraulic Oil

**CLIP & SAVE**

Also we stock the following:

- Gas & Diesel motor oils. SAE 30 and 40 15W40 (9.2 & 14 TBN); 3 grades of 10W30; Regular Hyd. oils in 4 different viscosities 22 - 32 - 46 - 68 AW
- Gear & Transmission Oils
- Vacuum Pump Oils
- Air Comp. & Air Tool Oils

Most of the above oils are available (many in stock) in factory blended NT additive versions. Also 2 cycle oils & hi-quality grease in stock.

Many people are aware that skid loader mfg's recommending 10W30 motor oil in the skid loader hyd system. Most brands of motor oils do not contain enough zinc and anti-wear additives for satisfactory life in these hi-pressure hydraulic systems. Most motor oils contain higher levels of zinc than other additives that are desirable in hydraulics. We now have a product called Skid Loader Oil. This high zinc oil is designed for hi pressure hydraulics and contains full dosage of NT additive.

**NT oil additive** is a synthetic ester with a strong negative charge. Esters are much better lubricants than reg oil and have been around for a long time but this is a new type of ester. Its value in wear prevention in almost all equipment is outstanding. It also helps prevent seal leakage.

King Oil Co. designed for and used in 100% of Caterpillar excavators. Equipment and has been proven to give better performance in the demanding applications. It has several times the level of anti-wear additives than most standard oils. King Oil Co. std. hyd. oils have 30% or more of the additive.

Ask us about high efficiency bypass filtration that can double or triple the life of nearly all types of hydraulic systems. With the use of Super Solvent and NT, it is possible to achieve system cleanliness many times cleaner than the average system out there. This is what extends equipment life. The above may change the way you think about removing contamination from all types of machines.

We recommend you test all diesel engines (when draining oil) at least 1 time if you have never done so to establish oil drain intervals, regardless of the brand oil you use.

\*Some may find the above hard to believe and say it is far out, but truthfully, it is not. Many things can be proven with used oil analysis. Even new oils can be tested to see if the manufacturer's claims are valid. We strongly recommend the use of independent laboratories that are not biased by any oil blender. We offer analysis kits from Wearcheck Labs in N.C. Engine oil test kits = \$18.00 ea (includes TBN & TAN). Hyd. oil kits = \$20.00 ea (includes particle count, spectrometric, water and acid tests). We can do filter patch tests no charge to customers - send us a sample in clean container (about 8 to 10 oz.).

**Preventive Maintenance Pays - equipment downtime is costly!**

Oil stocked in 1 & 5 gals. 55 gal drums and some in bulk (275 gal totes). We can deliver to your door. If you need price sheets or specification sheets and information booklets or technical information, write us or leave a voice mail. Or call 8:00 to 8:30 AM Mon. through Fri.

Let us know if you are interested in a monthly newsletter about equipment maintenance, product information & technical advice from John King and others in the industry.
