Custom Built Pole Buildings

HEAVY DUTY

SNOW

Heaviest Snow Load in Pole Buildings!

Some companies state "40 # per square foot snow load" - but really they are stating they have a 30 pound live/snow load on the top chord, plus a 5 pound dead load (required) on the top chord and a 5 pound dead load on the bottom chord and then add them all up to equal "40".

CONESTOGA uses the heaviest duty trusses available - a true 35 pound live or snow load on the top chord and a 5 pound dead load on the top chord and a 5 pound dead load on the bottom chord - so in their terms, CONESTOGA has a "45 pound" truss load!
