EVERLAST II EVERLAST II EVERLAST II

Metal Roofs Aren't Created Equal

EVERLAST II IS BETTER:

- it is galvanized heavier, like old times.
- it is heat formed, less paint cracks.
- is cut while hot, prevents early edge rust.
- won't scratch as easy, paint is harder.
- won't bend or buckle as easy, stronger design.
- laps are tighter, and virtually invisible.
- nail/screws seal better, ribs fit tighter to head.
- zinc phosphate, not chromate under paint.
- still priced about the same or less.

EVERLAST II
is excellent for houses and barns.
DOUBLE DIPPED GALVANIZED
is proven best for animals.
STANDING SEAM
is ideal for houses.

CAN ALSO BE PICKED UP OR DELIVERED FROM LEBANON PLANT

What's heat forming?

In metal roofing and siding it's the best way to go! Here is why. Everlast heats the paint very hot on their Everlast II product before they cut and form it into roofing and siding. Tests have proven that heating paint before cutting and bending prevents virtually all microscopic cracks in the paint. **Ask our competition if they heat form. It's important.** Normally manufacturers form and cut at room temperature. Unfortunately that cracks the paint causing early rust at formed bends and edges
