Everlast Roofing, Inc. Metal Roofing & Siding

The Ultimate G-100 Process
 "The Best"

- 1 Valspar 10S Finish Coat
- 2 Epoxy Primer
- 3 Zinc Phosphate Pretreatment
- 4 G-100 Zinc Coating
- 5 Full Hard Steel (80,000 min yield)
6. Heat formed, less paint cracks

NOTE! It is more important what is under the paint than what you see on top!

- 1 One of the best paints, superior acid rain, cracking resistance and color retention
2. Primer coat. promotes outstanding top coat adhesion
- 3 Zinc phosphate pretreatment This is a very important process - if your current supplier cannot supply you with this or does not know, you should reconsider
4. G-100 Galvanized: Most metal roofing has approx 40% less galvanized under the paint G-100 is more galvanized than most unpainted panels
- 5 Full Hard Anything less than full hard will bend easier, lower snow loads, etc
- 6 Heat formed Metal is painted before ribs are formed Most paint cracks at bends, heat forming greatly reduces cracks (check metal siding that is installed for 5-10 years)
- 7 Stronger design superior strength, more metal per L F
- 8 Add Everything Together And Price Should Be \$53.37 Per Square \$1.69 Per L F

OUR SPECIAL PRICE ONLY
\$48.32 PER SQUARE
\$1.53 PER LINEAL FT.
