**TW96**

Medium-Duty Cutter with Heavy-Duty Features!

96" Cut, 120 HP Center Gearbox, 90 HP Outboard Gearboxes, Pan Blade Carriers, Updraft Blades, Cat 4 Driveline, Slip Clutch Protection, Lift or Pull-Type, 540 or 1000 RPM, Replaceable Skid Shoes, Rated for 2" Diameter Material, Safety Deflectors Standard

**TW120**

The TW120 cuts a 120" swath of material. The center gearbox, rated at 120 HP, transfers power to the 100 HP outboard gearboxes. Torque dampers on both sides of the center gearbox help prevent driveline and gearbox damage caused from sudden shockloads. Massive 2-3/8" diameter output shafts in the outboard gearboxes help provide optimum service. The pull-type and semi-mount units require a 50 HP (min) tractor and the lift-type unit requires a 60 HP (min) tractor (with adequate front weights).

**TW120 - 10' Cut • TW84 - 7' Cut**

**UNIVERSAL QUICK ATTACH SKID LOADER MOWER SM60**

The SM60 skid steer mower from Servis-Rhino® and your skid steer loader can tackle a range of industrial, commercial, and agricultural mowing jobs.

**Cutting Width: 60"**

The skid steer loader must be equipped with an operator front protective door. Contact your skid steer manufacturer or an authorized dealer for equipping your loader with a protective door.

**DITCHBANK MOWER**

DB150. Over 30 years of hydraulic mower design experience has made the Rhino® DB150 the preferred choice of experienced operators for the mowing of pond banks, levees, drainage ditches, and hard-to-reach areas.

The DB150 can extend to a maximum of 158" from the center line of the tractor allowing the 60 inch rotary head to cut areas that are difficult or impossible to reach with ordinary mowers. By being hydraulically driven, maintenance is greatly reduced with the absence of belts and pulleys. The DB150 outperforms many competitive units with smaller hydraulic systems. The DB150 utilizes a 60 gallon hydraulic system which allows the unit to run cooler in tough mowing conditions. The large reservoir also serves as a counterweight and remains stationary on the mainframe eliminating the potential traffic hazard of a movable counter-balance weight. The DB150 features a heavy-duty three-point hitch using a lower double lug hitch system to fit a wide range of tractors. To help insure a clean cut, the DB150 features updraft blades and a blade tip speed of 20,028 FPM.

**NOW IS A GREAT TIME TO TRIM BACK THOSE FENCE LINES WITH A RHINO BOOM MOWER**

The Servis® 1548 hydraulic boom flail cutters are designed for mowing grass and cutting brush in hard-to-reach areas including roadsides, ditchbanks, ponds, and fence rows. Large model with up to 15 foot horizontal reach and up to 4" diameter brush cutting.
