**FEATURES
&
BENEFITS**

- Designed to cradle the collected rocks and debris while additional material is being collected
- Tire spacing determines the size of rocks and debris that will be retained while allowing the soil to sift back to the ground
- The 75" bucket width gives maximum production and covers most wheel bases of skid steer loaders and tractors
- The rake design is used to gather material away from buildings and obstructions, for faster clean up of debris, to level out clumps of dirt and to pick up pieces of sod
- Rake - Pile - Load debris from construction sites, pastures, fields and etc
- Bolt-on mounting for easy installation onto universal tractor loader mounts and universal skid steer loader mounts
