ANSWER — Robert Loss, Middleburg, wanted a recipe for soupies. He wanted the exact ingredients, press time, and cure time. He requested an actual recipe and not advice to contact a sausage association. Thanks to Lee Laverty, Mount Joy, for this recipe:

Soupies (Cured And Dried Sopressata Or Sopra Sada)

- 10 pounds of lean, coarse ground pork (if grinding the meat yourself, use grinder plate with ½-inch holes)
- 4 ounces of powdered dextrose or corn syrup solids (this adds sweetness and is optional). Can substitute 2 ounces table sugar.
- 8-9 tablespoons regular salt
- 4 ounces black pepper (course or fine ground, some can be whole)
- 2 level teaspoons of Con Yeager tinted curing salt Number 813
- ¾ to 1 tablespoon hot cayenne red pepper (optional)

Processing:

Meats should be coarse ground. Mix all ingredients well. Refrigerate for 2 days to let the flavors "marry." Re grind meats through a ¼-inch hole plate and stuff into a natural casing that is about 2 inches in diameter. (Sausage will dry and shrink to about 1¼ inches). Natural beef middles or hog middles are suitable and commonly used for this.

Cold smoke stuffed sausage for several hours or until desired color is obtained. Some processors do not smoke the meat. However, the antibacterial properties of natural smoking help to preserve the drying phase. The sausage is then hung up to dry for 6-8 weeks and loses about 40 percent of its original weight.

At the end of the drying phase, the sopressata is then cut to length and commonly stored in jars of olive oil. When eaten, it is commonly sliced thin and placed on crackers.

This sausage is usually made at home during the colder months, when it can be hung to dry in a cool place such as a garage or attic. Keep in mind that this meat product is not cooked, so care must be used to begin with the freshest and cleanest ingredients. Do not use venison.

ANSWER — M.J. Wade wanted recipes to make fruit roll-ups from natural ingredients. Thanks to M. Martin for this recipe:

Jell-O-Roll

- 1 cup water
 - ¾ cup Jell-O, any flavor
 - 24 large or 3 cups mini marshmallows
- Mix water and Jell-O. Microwave for 3 minutes on high. Add marshmallows. Microwave 50 seconds more until marshmallows are partly melted, then stir until all marshmallows are melted. Do not overmelt. Pour into greased 9 by 13-inch pan. Refrigerate until firm, or about 45 minutes. Loosen edges and roll like a jelly roll. Cut into thin slices.

Dairy Family Offers 'Taste Of Home'

PHILADELPHIA (Philadelphia Co.) — Paul and Nadene Cashell of NaPaul Farms in Chambersburg offer up an easy, cheesy corn chowder recipe in the current issue of Sargento Cheese's "Taste of Home's Recipe Collection."

The recipe is part of a special feature section sponsored jointly by the national dairy checkoff program and Sargento to help educate the public about the versatility of cheese and to salute America's dairy farmers. "Taste of Home" reaches more than 4 million consumers quarterly through subscription and retail checkout and newsstand sales. The current issue is available now through June 2.

The Cashells were among several producers from across the country invited to submit one of their favorite quick and easy recipes using cheese. All are members of the checkoff's Dairy Farmer Spokesperson Network, which helps educate the public about responsible on-farm production practices such as food quality, animal care, and environmental stewardship.

Dairy farmers who participate in the Dairy Farmer Spokesperson Network receive extensive media training and conduct media interviews in major consumer markets. The Cashells are members of both the national spokesperson network and a regional network sponsored by Mid-Atlantic Dairy Association.

As national spokespersons and former Young Cooperators for Land O'Lakes, the Cashells understand the need for dairy promotion. "We've been involved with programs such as the Young Cooperators for three years," Mrs. Cashell said. "We've learned a lot about the national promotional efforts, including advertising, through our involvement with the National Milk Producers Federation."

At NaPaul Farms, the Cashells milk 350 Holsteins and farm approximately 700 acres. They have four full-time and two part-time employees. Mrs. Cashell works away from the farm as a computer programmer for Computer Sciences Corporation, a government contractor for the Department of Defense.

The Cashells are being recognized for their dedication to the dairy industry. Their cheese and corn chowder is the April featured recipe on the www.ilovecheese.com Website.
