Rotary Rakes : Best for Drying

Most types of rakes roll the hay across the ground twisting it into a tight windrow that can't dry. Rotary rakes lift and carry hay "forkful" to form a light, fluffy windrow, which has maximum wind penetration. The result: Hay raked with a Kuhn rotary rake 8 hours after mowing generally dries about a day less drying time, compared to unraked hay. And with less leaf loss than if raked when dry.
