MILLWAY HOME IMPROVEMENTS LLC

What's heat forming?

In metal roofing and siding it's the best way to go! Here is why. Everlast heats the paint very hot on their Everlast II product before they cut and form it into roofing and siding. Tests have proven that heating paint before cutting and bending prevents virtually all microscopic cracks in the paint. **Ask our competition if they heat form. It's important.** Normally manufacturers form and cut at room temperature. Unfortunately that cracks the paint causing early rust at formed bends and edges
