Rotary Rakes - Best for Merging

- ◆ PTO Drive handles Heavy wet Windrows
- ◆ No Stones in the windrow
- ◆ No wads & No roping-No slugging chopper
- ◆ Rakes corners & headlands other rakes can't

Rotary Rakes - Best for Drying

Most types of rakes roll the hay across the ground twisting it into a tight windrow that can't dry. Rotary rakes lift and carry hay forkful by forkful to form a light fluffy windrow which has maximum wind penetration. The result: Hay raked with a Kuhn rotary rake 8 hours after mowing generally has about a day less drying time compared to unraked hay. And with less leaf loss than if raked when dry.
