Season to date	772

## Farming Forecast

Some sunshine is expected Sunday with warm temperatures but low humidity. There will be 7-10 hours of sunshine. Average humidity will be 45 percent. If you were unable to cut hay this past week, this may be a good week to catch up with near-seasonable temperatures and mainly dry weather. It will turn hotter toward the end of the week with temperatures approaching the 90s.

## Regional Forecast

# Cropping Ideas For Difficult Times

## Low Cost High Energy Forages

**High Energy Forages Make More Milk with Less Grain!**

### Summer King BMR

Plant Summer King BMR Sorghum Sudangrass in unplanted fields or weak alfalfa fields.

- A premium low lignin/low cost hybrid
- First cut ready in about 40 days.
- Later cuttings usually ready in 30 days.
- First grazing ready in about 30 days.
- Later grazing ready in about 21 days.

### Grazing Increases Profitability

Let the cows harvest your crop at a higher quality and lower cost. Managed grazing, as the name implies, does require high management. Call us or others with experience and learn this system. Profit per cow is typically \$100 - \$200 more than conventional systems. Cull rates typically drop, and cows tend to be healthier. Your cows and your family will thank you. BMR Sorghum Sudangrass is an easy crop to learn on.

For late summer seeding-  
**Plant Zorro & Perun**

If you like our BMR Sorghum Sudangrass quality, follow it up with **Zorro Italian Ryegrass (1-2 yr. crop)**, or **Perun festulolium (3 yr. crop)** for even higher quality. No-till directly into the BMR this Sept. after harvest.

## King's AgriSeeds LLC

Helping the family farm prosper by specializing in high quality forages and grazing since 1993.
