Farming Forecast

Clouds and sun is expected for Saturday with very warm temperatures and humid conditions. A thunderstorm could pop up in the afternoon or evening. There will be 6-10 hours of sun. The average humidity will be around 60 percent. For any work that needs to be done, this weekend will be dry, but humid and very warm. A storm system will move into the region on Tuesday and bring some rain.

Cropping Ideas For Difficult Times

Low Cost High Energy Forages

No-till Summer King BMR into weak alfalfa stands

Summer King BMR

Plant Summer King BMR Sorghum Sudangrass in unplanted fields or weak alfalfa fields.

- A premium low lignin/low cost hybrid
- First cut ready in about 40 days.
- Later cuttings usually ready in 30 days.
- First grazing ready in about 30 days.
- Later grazing ready in about 21 days.

Grazing Increases Profitability

Let the cows harvest your crop at a higher quality and lower cost. Managed grazing, as the name implies, does require high management. Call us or others with experience and learn this system. Profit per cow is typically \$100 - \$200 more than conventional systems. Cull rates typically drop, and cows tend to be healthier. Your cows and your family will thank you. BMR Sorghum Sudangrass is an easy crop to learn on.

Sorghum Sudan no-tilled into old alfalfa

Helping the family farm prosper by specializing in high quality forages and grazing since 1993.
