CUSHIONED EGG

Electronic Drives

The innovative, electronically-controlled drive system enables eggs to be transported on a smooth, continuous speed on an endless conveyor or with drive units located intermittently up to 150' apart.

Optimum Rod Spacing

Space between each cushioned rod is the key to egg separation and preventing smaller eggs from slipping through the conveyor while allowing all debris to be sifted out.

Design Flexibility

The unique "Cushioned Rod" egg conveyor enables you to custom design a system that gently transports eggs up, down, around corners and in a continuous straight line without transfer, and even declines to match processing equipment.

Custom Corners

The unique radial corner system in the Farmer Automatic rod conveyor can be custom designed to fit 15° through 90° turns.

ROD CONVEYOR TRANSPORT SYSTEM

Uni-Trac Construction

The "Cushioned Rod" egg conveyor is setting industry standards for efficiency, flexibility and cost savings with a unified construction design that eliminates the problems of egg transfer.

Rol-Link Chain System

An endless, custom designed, roller chain system and flexible cushioned plastic rods, cradle eggs in a gentle position that helps eliminate collisions and breakage.
