ASK FOR AMOS SR!**

**SE10**

Pull-Type

The pull-type SE10 requires only a 45 HP (min) tractor for economical, wide-cut mowing. A hydraulic cylinder or ratchet lift screw is available for raising and lowering the mower. A spring shock absorber is optional to help cushion shockloads to the mainframe when operating in rough terrain. (Unit shown with optional chain guards. Deflectors are standard.)

**TW120**

The TW120 cuts a 120" swath of material. The center gearbox, rated at 120 HP, transfers power to the 100 HP outboard gearboxes. Torque dampeners on both sides of the center gearbox help prevent driveline and gearbox damage caused from sudden shockloads. Massive 2-3/8" diameter output shafts in the outboard gearboxes help provide optimum service. The pull-type and semi-mount units require a 50 HP (min) tractor and the lift-type unit requires a 60 HP (min) tractor (with adequate front weights).

TW120 - 10' Cut • TW84 - 7' Cut
