

KELDERMAN DOWN-CORN REELS

Universal Component Reel Kit
Makes reel fully adjustable (up & down for & aft)

Basic Reel Kits
All the same mounting brackets are available for most brands. Kits available for 4R, 6R, 8R and 12R in virtually all brands of combines.

Hydraulic Drive
Simplifies system and allows variable speed of reel

Special Contoured Spokes
Are self-cleaning and do not interfere with standing corn. A Kelderman Exclusive!

Best thing yet to get that down-corn

Dump Wagon

RICHARDTON
A BINKLEY & HURST PRODUCT

Models 8010 8020

Increasing Efficiency of Haying and Forage Operations

Increase your efficiency of haying and forage operations without unhooking conventional wagons or waiting on trucks to return.

Pulling a Richardton wagon will reduce the compaction caused by truck traffic in the fields during a wet year.

8010 & 8020 Dump Wagon Features:

- The wagon with the 1 MINUTE DUMP CYCLE*
- Pull a Sunflower/Richardton dump wagon behind a forage chopper to collect and dump forage and haylage into trucks or other receptacles
- Single axle & auto-steer models available
- Positive action roof opener
- Hydraulic system with a cable assist is designed to unload large loads of up to 20,000 lbs quickly and efficiently, even if the load is not distributed evenly

- Smooth interior box sides
- Reinforced box design
- Patented hydraulic lock cylinders lock the box at dumping clearance height for solid, complete and safe dumping
- The diagonal slide system allows truck drivers close access to the dump wagon and reaches out to put load in the center of the truck box.

* Dump cycle time depends on hydraulic supply output
