GRANTVILLE (Dauphin Co.) — Even though snow still has an icy grip on Pennsylvania, producers couldn't help thinking about spring planting and next year's crop as they gathered recently at the Holiday Inn in Grantville for the 2003 Corn and Soybean Corn

After the product was developed and tested (a process that took 18 months), it was moved on to consumer testing. The university's football team was picked as the group of consumers to try the product.

After practice, researchers asked the players opinions of the drink, which resembles a chocolate milkshake, according to Roth. The players ultimately developed the drink and told us what they liked and didn't like, he said.

By N.C.A.A. rules, the drink could be no more than 30 percent protein. Pasteurized, as Penn State Creamery, it has a shelf life of 30-45 days.

Besides fast, healthy beverages, there are many things to learn at the conference. Participants will be measured dietary intake, and took blood and urine samples. They also asked the players to write their game on a numbered

professor, School of Hotel Restaurant and Recreation Management, from State University of New York at Buffalo, and Dr. Jim Kacap, chairman, Penn State Pennsylvania Soybean Production Board, co-chair.

LANDISVILLE (Lancaster Co.) — PCCA officers and board members gathered for a meeting at the Landisville Research Farm last August. Seated from left, are Russell McLucas, secretary; Guy Wagner, president; Jeff Werner, vice president; and Greg Roth, executive secretary. Standing, from left, are directors John Berry, Dan Wolf, Elwood Kyper, Steve Wenger, Jim Hershey, Mike Kuhns, John Yocom, and Matt Antos. Photo by Dave LeFever

Kyle Henninger, left, won the shelled corn no-till contest with 223.7 bushels per acre. With the win, Henninger will go to the Commodity Classic in Charlotte, N.C. Last year Henninger won first place in both the Pennsylvania and national shelled corn no-till classes. Herman Menbeck, Womelsdorf, had a third in the shelled corn no-till class.

Moving Our Industry Forward With Partnerships

I do a lot of traveling around the region and the state and I continue to hear many producers and industry

folks ask what we need to do to move our corn and grain industry ahead in Penn

syls into these trying times.

I think we are starting to make progress, but it's difficult to achieve much by working alone.

Many of us believe that just by working harder each day we can accomplish our goals, but I'm finding that by working together in partnerships

among industry, university, producers and government we can achieve things that one group cannot achieve alone.

I've seen numerous examples of this starting to happen in other regions and now starting to happen in our industry here in Pennsylvania.
