**What's against soft paint?**

In metal roofing and siding some manufacturers use soft pliable paint to prevent cracks. The disadvantage with softer paint is that it scratches so easy. Handling during erection, flying debris during storms, children playing against it, etc. can easily scratch softer paint. Scratches on softer paints tend to rust prematurely. Everlast heat forms to prevent this. Ask our competition if they heat form. It's important.

Everlast Roofing, Inc, 239 N. 5th Ave., Lebanon, PA 17046.

**You Must Hear what Brad says:**

"I couldn't be more pleased with my riding arena!"

The "Cadillac" of Fabric Structures

Brad Turley with Simba his horse - 7.8 Farms - Killingworth CT

"I knew what I wanted and I found it! After extensive research I knew I needed a fabric structure from We Cover. The facts that made my decision were:

- The Engineering** - when I saw their heavy built trusses and engineered drawings, I knew their building would hold up to the Atlantic Coastal winds and snow.
- The Lighting** - I can ride my horse in the natural light with no shadows to spook my horse
- The Design** - The Building has straight side walls giving me plenty of clearance for riding. The fabric is in 12' panels and each panel is tightened by a ratchet system. Add to the this the convenient overhang and a sensible ventilation system. These excellent features combined with the many options of this building package make it a real winner!

"My local building engineer is so impressed, he says he will never again recommend a traditional building for an indoor riding arena. "I recommend you call We Cover today!"

The strength, integrity, and appearance of a solid building along with the lighting and construction advantages of a fabric structure.
