

Everlast is stronger.

Everlast makes metal roofs and sides that are **substantially stronger than its competition**. Everlast II does not buckle as easy during erection, less popping and buckling while walking on it. Higher wind and snow loads. More attractive.

Everlast Roofing, Inc., 239 N. 5th Ave., Lebanon, PA 17046

You Must Hear what Brad says:

"I couldn't
be more
pleased
with my
riding
arena!"

Brad Juby with Simba in front of a 27' x 60' Pole Barn with a fabric structure.

"I knew what I wanted and I found it! After extensive research I knew I needed a fabric structure from We Cover. The facts that made my decision were:

- **The Engineering** - when I saw their heavy built trusses and engineered drawings, I knew their building would hold up to the Atlantic Coastal winds and snow.
- **The Lighting** - I can ride my horse in the natural light with no shadows to spook my horse.
- **The Design** - The Building has straight side walls giving me plenty of clearance for riding. The fabric is in 12' panels and each panel is tightened by a ratchet system. Add to this the convenient overhang and a sensible ventilation system. These excellent features combined with the many options of this building package make it a real winner!

"My local building engineer is so impressed, he says he will never again recommend a traditional building for an indoor riding arena. "I recommend you call We Cover today!"

The strength, integrity, and appearance of a solid building along with the lighting and construction advantages of a fabric structure.
