

**You Must Hear what Brad says:**

"I couldn't be more pleased with my riding arena!"

Brad Turley with Simba his horse at a Farm Killingworth CT

"I knew what I wanted and I found it! After extensive research I knew I needed a fabric structure from We Cover. The facts that made my decision were:

- "The Engineering** - when I saw their heavy built trusses and engineered drawings, I knew their building would hold up to the Atlantic Coastal winds and snow
- "The Lighting** - I can ride my horse in the natural light with no shadows to spook my horse.
- "The Design** - The Building has straight side walls giving me plenty of clearance for riding. The fabric is in 12' panels and each panel is tightened by a ratchet system. Add to this the convenient *overhang* and a sensible *ventilation* system. These excellent features combined with the *many options* of this building package make it a real winner!

"My local building engineer is so impressed, he says he will never again recommend a traditional building for an indoor riding arena. *"I recommend you call We Cover today!"*

**The strength, integrity, and appearance of a solid building along with the lighting and construction advantages of a fabric structure.**

**Everlast laps better.**

Everlast II metal roofing and siding overlaps are stronger, tighter, and virtually invisible. Lap edges are less subject to deforming bends during erection. Driving rain is less likely to penetrate at the laps.
