

**You Must Hear what Brad says:**

"I couldn't be more pleased with my riding arena!"

Brad rides with Sabre in his arena at Farm - Kalmia, Pa. U.S.

"I knew what I wanted and I found it! After extensive research I knew I needed a fabric structure from We Cover. The facts that made my decision were:

**"The Engineering** - when I saw their heavy built trusses and engineered drawings, I knew their building would hold up to the Atlantic Coastal winds and snow

**"The Lighting** - I can ride my horse in the natural light with no shadows to spook my horse

**"The Design** - The Building has straight side walls giving me plenty of clearance for riding. The fabric is in 12' panels and each panel is tightened by a ratchet system. Add to the this the convenient *overhang* and a sensible *ventilation* system. These excellent features combined with the *many options* of this building package make it a real winner!

"My local building engineer is so impressed, he says he will never again recommend a traditional building for an indoor riding arena. "I recommend you call We Cover today!"

**The strength, integrity, and appearance of a solid building along with the lighting and construction advantages of a fabric structure.**

EVERLAST II EVERLAST II EVERLAST II

**Metal Roofs Aren't Created Equal**

EVERLAST II IS BETTER:

- it is galvanized heavier, like old times.
- it is heat formed, less paint cracks.
- is cut while hot, prevents early edge rust.
- won't scratch as easy, paint is harder.
- won't bend or buckle as easy, stronger design.
- laps are tighter, and virtually invisible.
- nail/screws seal better, ribs fit tighter to head.
- zinc phosphate, not chromate under paint.
- still priced about the same or less.

EVERLAST II

is excellent for houses and barns.  
**DOUBLE DIPPED GALVANIZED**  
is proven best for animals.  
**STANDING SEAM**  
is ideal for houses.

CAN ALSO BE PICKED UP OR DELIVERED FROM LEBANON PLANT
