

## Lancaster Farmland Trust Banquet

(Continued from Page A23)

Amish family that owns this farm was the fourth family in Leacock Township to preserve in the past year. The farm is adjacent to the previous farm, creating the important "building block" effect of preserved farmland. The farm has 1,600 feet of frontage along the Pequea Creek and contains 96 percent prime agricultural soils. A dairy and small hog operation exists on the farm.

- Karen M. Wenger, Ronald D. Wenger, and estate of C. Bruce Wenger, March 2003. Staff had been working with the Wenger family for more than two years before their 80-acre Elizabeth Township farm was preserved in March of 2003. The farm was sold at auction to an adjacent Amish farmer who plans on running a small dairy operation. Its 3,700 feet of road frontage makes for a wonderful view as you drive along Brubaker Valley Road. It contains 100 percent prime agricultural soils and is so flat that you can see the entire farm while standing anywhere on the property.

- Anonymous, 2003. This farm, the fifth to be preserved in

Leacock Township, is owned by an Old Order Amish family. It is adjacent to another preserved farm and is only one property away from two more preserved farms. The farm is within a half mile of the Intercourse UGB. It has more than 2,800 feet of road frontage and contains 100 percent prime agricultural soils. This farmer has been very direct in stating he wants to see more farms preserved in Leacock Township and has offered to help whenever he can.

- Anonymous, August 2003. This beautiful Strasburg Township farm was preserved just this past summer. The owner of the farm was undecided if he wanted to preserve with the Trust or with the Ag Preserve Board. After hearing his farm would probably not be preserved for at least three years with the Ag Preserve Board, he decided to preserve with the Trust. This farm has more than 3,000 feet of frontage along the Beaver Creek, which was fenced off from the cattle in 2001. The farmer worked with the Chesapeake Bay Foundation and Ducks Unlimited to accomplish this goal.

- Robert R. Herr, August

2003. These two farms are located in Drumore Township and are owned by Robert Herr. Herr worked with the Trust a few years ago to preserve a different farm in Drumore Township. The 60- and 25-acre pieces were important to preserve because of their proximity to other preserved farms, as well as their proximity to the Lancaster County Conservancy's Fishing Creek Preserve. There is a chance that one of the neighboring farms may also be preserved in the near future.

- Herma R. Losensky, September 2003. This 18-acre farm was preserved in conjunction with Warwick Township using their Transferable Development Rights (TDR) Program. The farm is adjacent to the Kline farm that was preserved in December of 2002 and is also adjacent to the UGB. Trust staff and Warwick Township have focused on the surrounding farms as ones to target for the next TDR transfer.

## 2004 Texas Longhorn Calendar Now Available

BARNESVILLE, Ohio — The 2004 Texas Longhorn Celebrity Calendar featuring ranch scenes and portraits of famous Texas Longhorn Cattle is available for Christmas gifts and the New Year. The new publication features a cover shot of the popular brindle sire, "Shadowizm." Shadowizm is the top herd sire for Larry Stewart, Lazy L Longhorns, Midland, Texas.

Thirty color graphics were selected from Michigan, Ohio, California, Texas, Utah, Arizona, and

Oklahoma for monthly displays. Longhorn admirers will cherish never-before-published photos of nationally famous Longhorns which will be excellent for farming at year's end.

The calendar is a large 13x19½-inch open wall size. Past editions have been recipients of Award of Merit and World Calendar Awards. To order by mail, send \$10 each to Texas Longhorn Celebrity Calendar, 35000 Muskrat Road, Barnesville, OH 43713.

The 2004 Texas Longhorn Celebrity Calendar publishers selected 30 original color graphics for the 2004 publication. The famous brindle sire "Shadowizm" owned by Lazy L Longhorns, Midland, Texas was the choice specimen for the calendar front cover.

### FARM SHOW 2004

What a treat we have in store for the annual *Lancaster Farming* issue of Farm Show!

Scheduled for the Jan. 10 issue: features from farmers who are going to the winter agricultural showcase event at the Farm Show Complex and their experiences in attending the great event in Harrisburg. Also scheduled: the annual FFA Keystone Degree winners and a complete schedule of events, including the many demonstrations for farmers during Farmer Days.

### Hot Air Circulator (Needs NO Electricity)

- Special top-vents create a natural draft
- Burns coal
- Cast Iron Doors & Grate
- Exterior handle for clean shake-down

### D.S. Machine Shop Stoves & Chimneys

238B Old Leacock Rd., Gordonville, PA 17529

## CUSHIONED EGG

### Electronic Drives

The innovative, electronically-controlled drive system enables eggs to be transported at a smooth, continuous speed on an endless conveyor with drive units located intermittently up to 150' apart.

### Optimum Rod Spacing

Space between each cushioned rod is the key to egg separation and preventing smaller eggs from slipping through the conveyor while allowing all debris to be sifted out.

### Design Flexibility

The unique "Cushioned Rod" egg conveyor enables you to custom design a system that gently transports eggs up, down, around corners and in a continuous straight line without transfer, and even declines to match processing equipment.

### Custom Corners

The unique radial corner system in the Farmer Automatic rod conveyor can be custom designed to fit 15° through 90° turns.

## ROD CONVEYOR TRANSPORT SYSTEM

### Uni-Trac Construction

The "Cushioned Rod" egg conveyor is setting industry standards for efficiency, flexibility and cost savings with a unified construction design that eliminates the problems of egg transfer.

### Rol-Link Chain System

An endless, custom designed, roller chain system and flexible cushioned plastic rods, cradle eggs in a gentle position that helps eliminate collisions and breakage.

### Ideal Conveyor Widths

16" - 20"  
24" - 30"

## HEAVY DUTY HOOF TRIMMING TABLES

Endorsed by the International Hoof Trimming School of Wisconsin

- 12-year building experience in the tables design
- 2"x2" tube frame chute
- chute measures 75"x28"x75" high
- 4" casters for cradle fold-up
- 2 10-inch lift belts
- 3500 lb. axle with or without brakes
- two hydraulic cylinders for extra stability
- tool box for D.C. pump and battery protection
- manure grate to keep work area clean
- fold away side gate
- removable head board
- 45 min. video from International Hoof Trimming School of Canada

### FOUR MODELS TO CHOOSE

1. PORTABLE
2. STATIONARY
3. 3-POINT HITCH
4. SKID STEER MOUNT
