**What's against soft paint?**

In metal roofing and siding some manufacturers use soft pliable paint to prevent cracks. The disadvantage with softer paint is that it scratches so easy Handling during erection, flying debris during storms, children playing against it, etc can easily scratch softer paint. Scratches on softer paints tend to rust prematurely Everlast heat forms to prevent this. **Ask our competition if they heat form. It's important.**

Everlast Roofing, Inc, 239 N. 5th Ave., Lebanon, PA 17046. Call toll free 1-888-339-0059 for info. & nearest dealer. (Mid-Atlantic, New England, Midwest)

**You must hear what Brad says:**

The "Cadillac" of Fabric Structures

Brad Turley with Smith's Farm, 28 Farms, Killingworth, CT

**"I couldn't be more pleased with my riding arena! (And my neighbors are talking, too!)"**

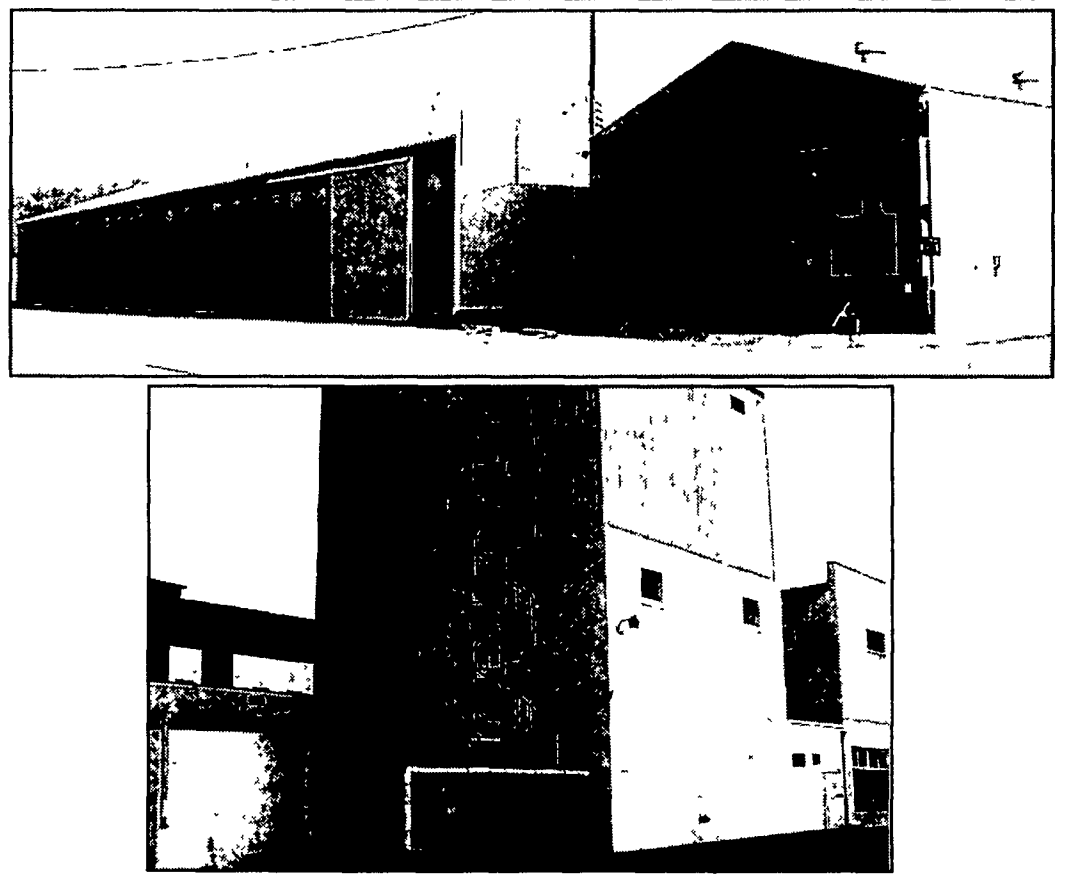

"I knew what I wanted and I found it! After extensive research I knew I needed a fabric structure from We Cover. The facts that made my decision were

- The Engineering** - when I saw their heavy built trusses
- The Lighting** - I can ride my horse in the natural light
- The Design** - The building is designed like a building should be
- The Ventilation** - The side curtains excellent air movement

My local building engineer is so impressed he says he will never again recommend a traditional building for an indoor riding arena
