 PA farmers have great hay crops with South Dakota alfalfa seed
 Painterland Farms Westfield PA John Painter said "The Trask's seed grow extremely well. We recommend it to anyone. It is real leafy and yielded as well as any of the high priced name brand seeds. It cost 40% as much. We planted 294 acres. We intend to plant more this spring. It was exceptionally winter hardy and resisted frost damage. We are very pleased."
 We grow & sell over 400,000 tons of hay each year all over the USA
 South Dakota Common Alfalfa is superior to any variety and we challenge all comers to prove better in our field. We buy South Dakota Common from the Trask's & encourage others to do the same!

USA-GYPSUM
 Improving soils - naturally!
 21% calcium - 17% Sulfate
 Gypsum is a soil conditioner, amendment & fertilizer
 Want better soil, deeper water infiltration and healthier root systems?
 • pH neutral source of calcium 100% more soluble than lime
 • Provides Sulfur in sulfate form - The form plant roots can absorb
 • Loosens heavy clay & compacted soils - lets air & water penetrate
 • Reduces erosion on slopes and soils with poor structure
 • Reduces nutritional tie-up & makes NP&K more available
 • Improves acid soils especially when co-used with lime
 • Prepare soil for no-till. Unlike lime, which must be incorporated into the soil and come in contact with soil acids to be released, gypsum supplies a constant supply of soluble calcium to the soil
 • Improves fruit & produce quality & reduces some plant disease
