WE DELIVER

You must hear what Brad says:

*"I couldn't be more pleased with my riding arena!
 (And my neighbors are talking, too!)"*

"I knew what I wanted and I found it! After extensive research I knew I needed a fabric structure from We Cover. The facts that made my decision were:

- **The Engineering** - when I saw their heavy built trusses
- **The Lighting** - I can ride my horse in the natural light
- **The Design** - The building is designed like a building should be
- **The Ventilation** - The side curtains excellent air movement

My local building engineer is so impressed, he says he will never again recommend a traditional building for an indoor riding arena

EVERLAST II EVERLAST II EVERLAST II

Metal Roofs Aren't Created Equal

EVERLAST II IS BETTER:

- it is galvanized heavier, like old times.
- it is heat formed, less paint cracks.
- is cut while hot, prevents early edge rust.
- won't scratch as easy, paint is harder.
- won't bend or buckle as easy, stronger design.
- laps are tighter, and virtually invisible.
- nail/screws seal better, ribs fit tighter to head.
- zinc phosphate, not chromate under paint.
- still priced about the same or less.

EVERLAST II
 is excellent for houses and barns.
DOUBLE DIPPED GALVANIZED
 is proven best for animals.
STANDING SEAM
 is ideal for houses.

CAN ALSO BE PICKED UP OR DELIVERED FROM LEBANON PLANT

- Ceiling systems designed for your dairy, swine, and poultry facilities, as well - as shops, warehouses, garages, arenas, and more.

Tired of working in a cold, noisy shop?
 These ceiling systems are designed to hold any amount of insulation, and with insulation above, produce sound reduction qualities much greater than steel

Are you frustrated with the birds in your implement shed?
 Get the problem under control with a triply ceiling, as well as greatly improving the lighting.

Is the banding in your hog or poultry barn deteriorating?
 Let us replace them with our heavier polyester bands which do not stretch or become brittle over time

Contemplating a drop ceiling?
 Demand a triply ceiling above your drop ceiling if there is insulation being installed. This will serve as a vapor barrier along with permanently preventing falling insulation.

Providing the Ag industry with a very durable, attractive, waterproof, noncorrosive, alternative to conventional ceilings at a fraction of the cost.

We can also meet All you Insulation Needs!
