Scrofula, or King's Evil, Is a constitutional disease, a corruption of the blood, by which this fluid becomes vitated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofu-lous taint is variansly caused by mercurial disease, low living, disordered or unhealthy food, impure air, filth and filthy habits, the depressing vices, and, above all, by the venereal infection. What-ever be its origin, it is hereditary in the constitu-tion, descending "from parents to children unto the third and fourth generation;" indeed, it seems to

tion, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the finiquities of the fathers upon their children." Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tuber-eles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; conscroulous complaints, but they have far less power to withstand the attacks of other diseases; con-sequenty, vast numbers perish by disorders which, although not scrofolous in their nature, are still ren-dered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamina-tion; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggragated by the same auge

from or are aggravated by the same cause. One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

AYER'S

Compound Extract of Sarsaparilla,

Compound Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this every where pre-valing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this foul disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections which arise from it, such as ExcPrive and Skir Disnarses, Sr. Awnows's Fine, Rose, or Environment, Privates, Pusteres, Bians and Boits, Traons, Terren and Sart RHEUM, Scald Head, RINGWORM, RHEUMATISM, SYPHILTIC and MERCHARL DISEASES, DROPSY, DYSPERSIA, DEBILITY, and, indeed, ALL COMPLAINTS ARISNO FROM VITIATED OR IMPORE BLOOM. The popular belief in "*impuring of the blood*" is founded in truth, for scrofula is a degeneration of the blood. The particular purpose and virtue of this Sarsapa-rilla is to purify and regnerate this vital fauld, without which sound health is impossible in con-taminated constitutions. taminated constitutions.

Ayer's Cathartic Pills, FOR ALL THE PURPOSES OF A FAMILY PHYSIC,

FOR ALL THE PURPUSES OF A FAMILY PHYSIG, are so composed that disease within the range of their action can rarely withstand or evade them. Their pen-etrating properties search, and cleanse, and invigorate every portion of the human organism, correcting its diseased action, and restoring its healthy vitalities. As a consequence of these properties, the invalid who is bowed down with pain or physical debility is astonished to find his health or energy restored by a remedy at once so simple and inviting. Not only do they cure the every-day complaints of every body, but also many formidable and dangerous diseases. The agent below named is pleased to furnish water and any contraining certificates

vanced stages of the disease. So wide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of country abounds in persons publicly known, who have been restored from alarning and even desperate dis-superiority over every other medicine of its kind is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangerous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upon the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.
