Hammon-ton Lands—NEW ENGLAND SETTLEMENT—RARE OPPORTUNITY.—TO ALL WANTING FARMS—A healthy place, twenty-five miles from Philadelphia, on the Camden and Atlantic railroad, New Jersey. An old estate has been recently opened for sale, and the first division of 10,000 acres divided up into farms of twenty acres and upwards. The soil is of the best quality for the production of fruits, grains &c. The price is \$15 to \$20 per acre, payable in easy quarterly yearly instalments, with a term of four years, with interest. The terms are made easy, in order to insure the rapid improvement of the land, by enabling every industrious man to buy a farm. It is now being extensively improved by good roads, and some of the best citizens from New England and the Middle States are erecting large improvements. It is a scene of the greatest improvement out of Philadelphia. Seventy-five houses have been built in four months. Practical farmers and business men from the length and breadth of the Union are settling there. It is an important business place, on account of its being in the midst of a great market. Every article raised upon this land finds an immediate sale. The water is excellent, and no such thing as fever is known. The soil is a sandy loam, with a clay bottom and retentive of manures. It is free of phosphates, and such is its fertility that from the crops produced both upon this land and the large area adjoining under cultivation, it will be found not to be excelled anywhere in the production of crops most adapted to its market. The reaper may be well aware that the earliest and best fruits and vegetables come from New Jersey, which are annually exported to the amount of millions of dollars. The reaper has an abundance of the best quality of fertilizers, has an abundant supply of the best quality of muck manure. Lumber and building materials can be had on the spot at a cheap price, from the mills. Other mills are now being opened, and brick yards being started on the ground. A person can put up a frame tenement for present convenience for one hundred dollars. On account of the extensive emigration, this is the best course to pursue in order to get a place to live in first. Carpenters and builders are on hand to put up houses on the best terms.

In settling here the emigrant has many advantages. He is within the hour's ride of the great cities in the Middle States and New England, and near his old friends and associates; he is in a settled country, where every improvement and comfort of civilization is at hand; he is in a healthy place, and is not subject to the malarial fevers which are so prevalent in the Middle States and New England, and near his old friends and associates; he is in a settled country, where every improvement and comfort of civilization is at hand;
